Art Unit: 1754

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 23, 2003 has been entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 7,11,15,21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claims 7,11,15,21, the changes made in each claim are not supported by the instant specification and thus are new matter. The recitation of Sc, Ti, V, Cr, ... and Zn in these claims is new matter. Instant pg. 19 does not support any of the changes noted above.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1754

Claims 7,11,15,21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 7,11,15,21, proper Markush language is required before "consisting of" ie. selected from the group consisting of, otherwise the claims are indefinite and confusing as to exactly what the 3d transition metal is.

In claims 11,21, "said mixing step" and "said deaerating step" lack(s) proper antecedent basis in the claim(s).

In claims 11,21, although each claim is directed to making a battery there are no positive process steps recited for making the battery which renders the claim confusing and indefinite as to its scope.

Applicant's arguments filed October 23, 2003 have been fully considered.
